

Improve route into City via river

The route along the river into town has been developed piecemeal. It needs a few small tweaks, to make it a clear through route.

Small bits of tarmac. There's a small gap in the tarmac where you turn from the southern river path onto the Old Gasworks Bridge (1).

There's also a final short section yet to be tarmac'd near Osney Island (2).

Dropped kerb in St Ebbes. There needs to be a dropped kerb where the path meets Trinity St (3).

Cutting back vegetation in St Ebbes. From the river path through to Trinity St, the vegetation needs trimming (4).

Signposts / advertising / grand opening. Signposts are needed to make the through route clear (5). Then we need to tell people about it and have a party.
